## THE A-FRAME

# THE A-FRAME

The a-frame is a flexible and cost-effective solution for a wide range of purposes and events.

Depending on the finality, the a-frame has many types of coverings: **non-insulated** (e.g. soft PVC roof and sidewalls), **semi-insulated** (e.g. thermo inflatable PVC roof), and **fully insulated** (e.g. insulating sandwich panels both on the roof and sidewalls).

Its versatility makes this a great solution for many purposes, from weddings, to warehousing, and sports fields.

The a-frame is available in any length (in 5m increments) and with a width of up to 50m.
