ADJUSTABLE FLOORING SYSTEM

ADJUSTABLE FLOORING SYSTEM

Irmarfer floor is adjustable and adaptable to different heights while maintaining stability.

The success of this system is undeniable, not only due to the ease and speed of installation but also because of the robustness and safety of its materials.

Thanks to the self-leveling system, which can be leveled between 0,2 and 2,90 meters, this floor can be installed in almost any location.

It's multifunctional and complies with all dimensional criteria and allowable loads, offering numerous possibilities for use.

It's also compatible with all Irmarfer solutions, so you can use it with other structures.

KEY ADVANTAGES

- Lightweight and highly portable, making transportation effortless
- Quick and easy assembly process, saving time during setup
- Self-leveling system ensures perfect alignment on uneven surfaces
- Durable and resilient, built to withstand heavy loads and frequent use
- Versatile design, adaptable for a wide range of applications
- Modular construction allows for easy customization and expansion
- Weather-resistant materials ensure long-lasting performance in outdoor environments
