## STAGES WAVE 70M

# STAGES - WAVE 70M

Our stage design options are endless! Our team can adjust the stage to fit your technical needs, from the design to the height to the load suspension points. With our custom solutions, your event will be nothing short of show-stopping!

The wave is a unique architectural structure that fulfills the requirement for expansive stages while also providing exceptional acoustic properties.

In addition to its ample dimensions, this structure boasts an impressive loading capacity of up to 40 tonnes, all while ensuring safety and structural stability.

Undoubtedly, the wave will provide an unparalleled entertainment experience.

The 70m wave is the centerpiece of Rock in Rio's "Palco Mundo".
