

# ALUMINIUM STRUCTURES

## ADVANTAGES

[www.irmarfer.com](http://www.irmarfer.com)

## WHY CHOOSE ALUMINIUM?

- Short building time
- Turn key solutions
- Predefined quality of buildings
- Scalability and adaptability
- Low maintenance
- Low CO2 footprint

## BENEFITS OF THE IRMARFER ALUMINIUM SYSTEM

### SHORT BUILD TIME

Pre-design and production of buildings for rapid assembly on site.

### TURNKEY SOLUTIONS

We offer turnkey solutions, from design, construction, and adaptation to building maintenance.

### PREDEFINED QUALITY

All construction elements can comply with the CE marking and are subjected to the strictest quality controls.

### LOW MAINTENANCE

Minimum maintenance of the structures, even in aggressive environments, due to the antioxidant properties of aluminium.

### SCALABILITY

Expandable and adaptable buildings to your activity thanks to the use of replicable structures of modular architecture.

### SIMPLE CONSTRUCTION

All constructive elements are assembled through clicking and/or screwing methods, simplifying the assembly.

### RELOCATABLE

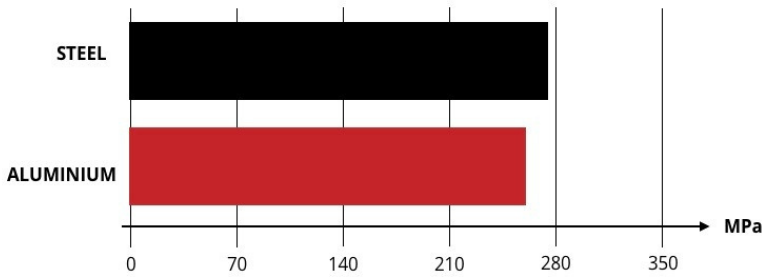

IRMARFER buildings can be disassembled, transported, and relocated to a new location.

### CONTINUOUS INNOVATION

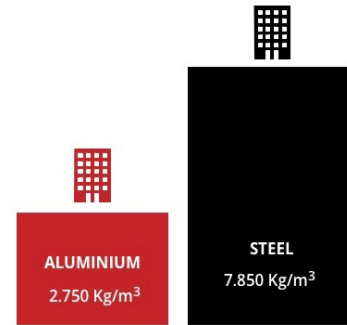

Our R&D and engineering teams focus their efforts on developing innovation on the IRMARFER System using state-of-the-art software.

## ENDURANCE AND DENSITY ARE THE KEY CONCEPTS IN OUR STRUCTURES

ENDURANCE: ALUMINIUM VS STEEL

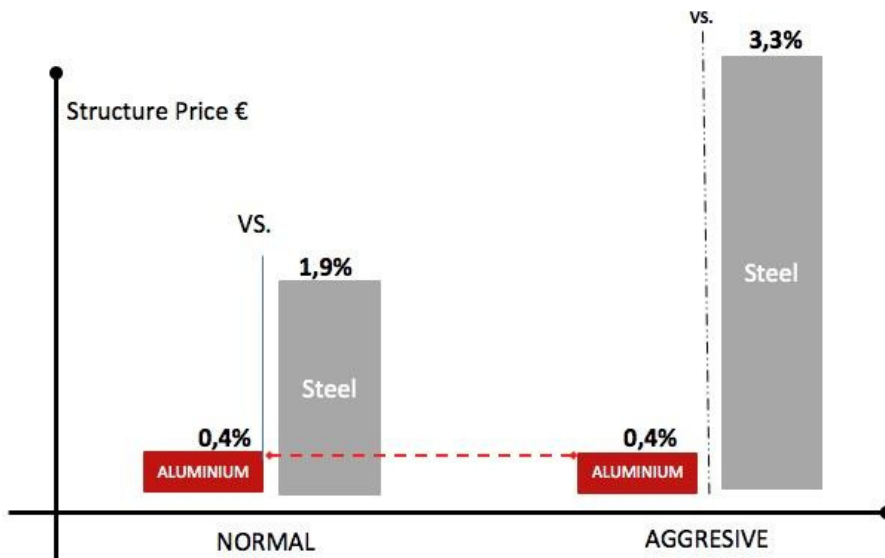

DENSITY: ALUMINIUM VS STEEL

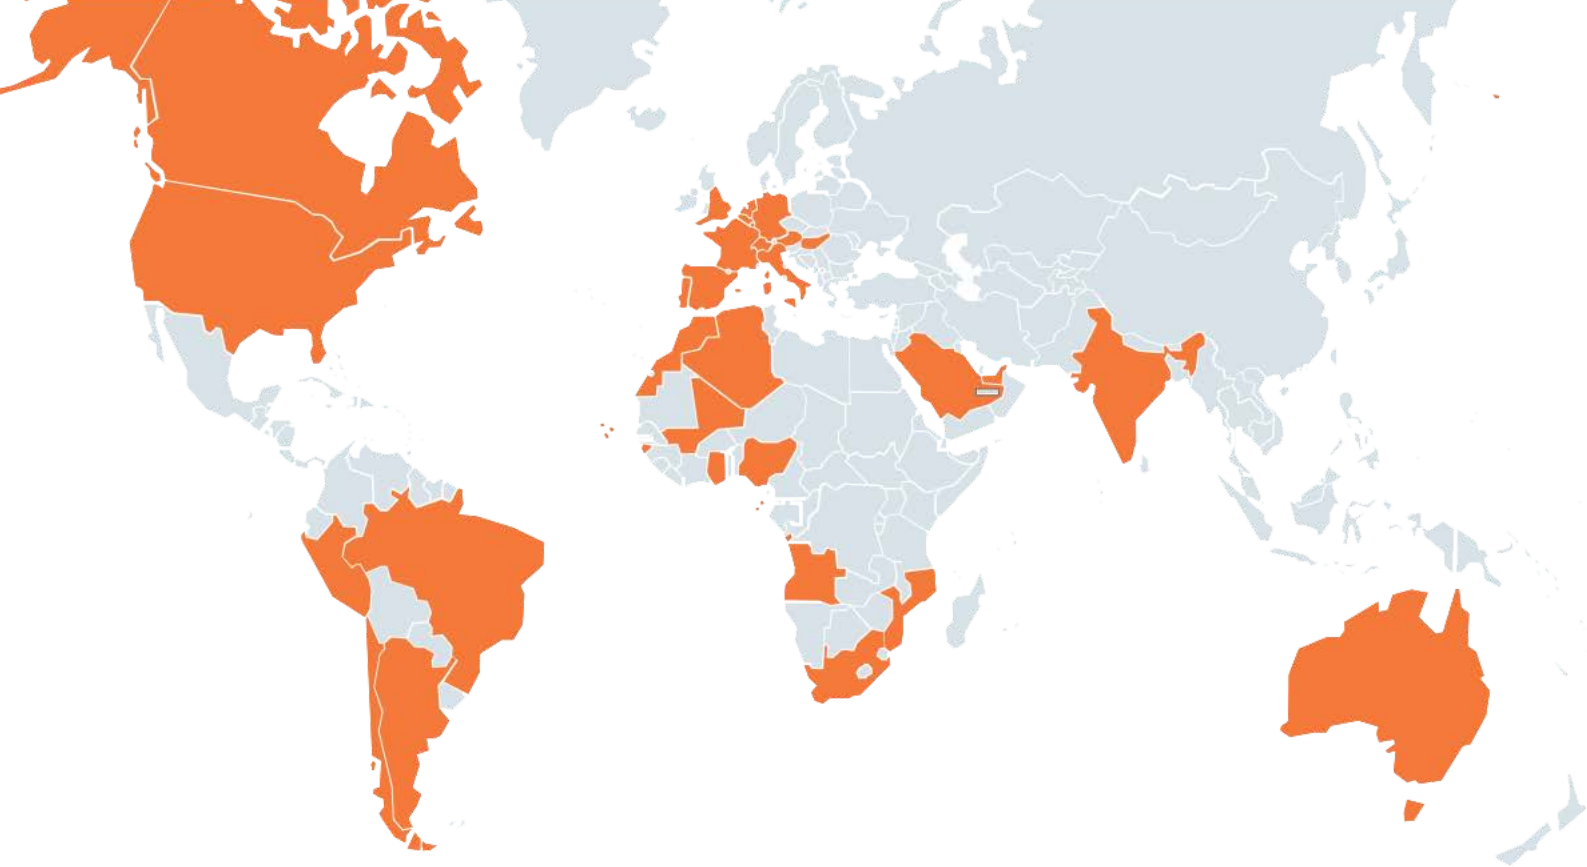

## ANNUAL ECONOMIC IMPACT IN THE MAINTENANCE OF THE BUILDINGS: ALUMINIUM VS STEEL

With respect to a steel structure, the Aluminium system is:

- **5 times cheaper in normal environment**
- **8 times cheaper in an aggressive environment**

## IRMARFER WORLDWIDE

Algeria	Cape Verde	India	Peru
Angola	Chile	Italy	Sao Tome and Principe
Argentina	England	Luxembourg	Saudi Arabia
Australia	France	Mali	South Africa
Austria	Germany	Morocco	Spain
Belgium	Ghana	Mozambique	Switzerland
Brazil	Guinea-Bissau	Netherlands	United Arab Emirates
Canada	Hungary	Nigeria	United States of America
